Hardy, Pedigreed

Northern Field-Grown

Nursery Stock

for

City, Farm, and
Suburban Homes

PRICE LIST

No. 25-L

C. W. Stuart & Co., Inc.

ESTABLISHED 1852

Newark, New York State

Transportation Charges

Freight, express or parcel post shipping charges are not included in our selling price. On *express* and *freight* shipments, *customer pays the transportation charges* upon arrival of their order.

On *parcel post* shipments we include the postage with the customer's bill.

To include transportation charges in our prices is positively impossible as we cannot determine the size or weight of each order until it is completely packed for shipment. In addition—quicker arrival in better condition is assured the customer if charges for service rendered is collected at destination. Because extra time is required at our local freight and express office to bill out prepaid shipments when thousands of orders are going forward each day.

Complete customer satisfaction is assured as *we include with each customer's order of \$5.00 or more extra Nursery Stock of equal or greater value to cover transportation charges.*

Transportation charges on Retail Orders are usually from 25¢ to 95¢ depending on varieties and sizes ordered. Should your customer prefer to select some item for shipping charges, please write same on the order. Otherwise we will select and ship with each order of over \$5.00 an item that we believe will please your customer.

Fall Planting

In most sections everything can be planted with perfect safety in the Fall and fine results obtained.

In extremely cold sections we recommend Spring planting for Perennials, Privet Hedging, Evergreens, Everblooming Roses, Peach Trees, Raspberries and Strawberries and recommend Fall planting of everything else. This refers to Maine, New Hampshire, Vermont, Northern New York, Northern Michigan and Northern Wisconsin.

We urge Fall orders because experience shows our customers are well pleased with results when they plant in the Fall.

Important Notice

No advance payment is required on orders of \$2.00 or over.

Due to the cost of bookkeeping and handling small accounts, *orders for less than \$2.00 should be sold for cash*, to be paid by the customer at the time the order is booked.

A Common-Sense Talk On Quality

Remember Topsy, the little pickaniny of Uncle Tom's Cabin? Topsy "jest growed."

But Superior Quality Nursery Stock doesn't "jest grow."

No indeed! Superior Quality Nursery Stock is the result of ideal climate, good rich soil and exacting care combined with:

SIX POINTS OF SUPERIORITY THAT RESULT IN GENUINE SATISFACTION TO YOU

Pedigreed Parentage

Shield-Type Budding Protection

Scientific Root and Top Pruning

Nu-Way Spacing

Entire Root-Wrap Moisture Control

Official Inspection

The now famous Six Point Program of Superiority is winning hosts of friends every season. That's the best proof of the Prize Winning Quality of stock produced as a result of these five scientific steps in propagation.

PEDIGREED PARENTAGE

Why does one apple tree come into bearing a year or two earlier than another? PEDIGREED PARENTAGE! Why are apples on the good tree larger, heavier, juicier, of a fine, full bodied rich flavor and of excellent keeping qualities, while from the ordinary tree that "jest growed" the fruit is sparce and small and of a decidedly poor flavor? PEDIGREED PARENTAGE!

Why does a superior quality shrub or rose in the home owner's garden develop into a vigorous, hardy, full sized plant bearing a profusion of large, strong-stemmed, brilliantly colored blooms, while the ordinary bush is a comparative weakling? PEDIGREED PARENTAGE!

Pedigreed Parentage means selecting and discarding, picking and choosing, till exactly the right seedling stock is obtained and then the union (or marriage) with it of the finest and most appropriate type of budding stock.

That is Pedigreed Parentage.

SHIELD TYPE BUDDING PROTECTION

Scientific experiments have definitely shown that the methods of budding formerly employed, where this important operation was done in the cheapest way, resulted in nursery stock distinctly inferior to Pedigreed Stock.

To meet the exacting standards of Shield Type Budding Protection the cut which is made in the seedling (root stock) for the purpose of inserting the bud (variety stock), is a Shield Type incision.

The operation must be done at exactly the right time, when both the seedling and bud variety are in proper condition for growth. The bud must be of just the proper maturity to slide in the incision without forcing, which might injure the bud and weaken the plant.

SHIELD TYPE BUDDING PROTECTION is a most important factor in the production of finest quality nursery stock of genuine value.

SCIENTIFIC ROOT AND TOP PRUNING

Scientific Root and Top Pruning replaces the ordinary haphazard methods, which so often result in inferior grades and disappointment to the home owner, with exact scientific methods that are sure to please.

Tests have demonstrated that ideal root and top pruning are absolutely essential to the production of Nursery Stock that is really superior in quality.

Leader Removal, that is the cutting out of part of the main branch or leader, is a type of pruning essential in the case of many varieties. It retards natural growth to obtain a heavy, well-branched, well-shaped tree or plant.

In other varieties, tests have demonstrated that heavy, bushy, shapely specimens are best obtained by Multiple Top Pruning, at predetermined intervals, throughout the growing period at the Nursery Farms.

Scientific Pruning develops an unusually heavy, compact root system, that permits transplanting with a minimum degree of shock and a consequent minimum interruption to natural growth.

That is why it is possible to offer our customers the protection of an exceptionally liberal replacement guarantee.—“IT GROWS OR WE REPLACE IT FREE OF EXTRA CHARGE.”

ENTIRE ROOT-WRAP MOISTURE CONTROL

Superior Quality Nursery Stock, handled and packed by the New Moisture Control, Entire Root-Wrap Method, insures arrival at customers' homes in the same field-fresh, ready-to-grow condition as when dug at the Nursery Farms.

Nursery Stock that is allowed to get too dry becomes permanently damaged and results in stunted, scrawny specimens, which never develop their natural beauty and productiveness.

If packed too wet, stock may become soft—premature growth may start and overheat in transit. When planted, unnatural growth may result in lack of root nourishment to keep pace with top development—and the plant withers and dies.

The new MOISTURE CONTROL ENTIRE ROOT-WRAP METHOD eliminates all these troubles. Each shipment—each individual piece of stock—receives *exactly the right amount of moisture* for delivery as Mother Nature intended, in ideal condition for successful planting. That means satisfied customers.

OFFICIAL INSPECTION

Every year the nursery stock in our big complete line is thoroughly inspected by the New York State Department of Agriculture and Markets. A certificate of inspection is issued to us after inspection, upon finding our stock free from injurious insects and plant diseases. It is our permit to sell and ship such stock in and out of New York State. A copy of this Certificate is filed with the Department of Agriculture in every State where we do business, and a copy of this Certificate is attached to every customer's shipment of stock.

But that's only a routine procedure, required by law. We go further. At great expense, Dr. Shaw or a member of his staff inspects all apple, pear, plum and cherry trees to make sure the trees are true-to-name. Humans, with the best of intentions, makes mistakes. Mistakes may be made even after the greatest care. We check finally on that human weakness to prevent disappointment to our customers.

This, too, is one of the extras—just another of our “Points of Superiority”.

(A Common Sense Talk on Quality continued on page 19)

TWO YEAR OLD FIELD GROWN

Hardy XXX Perennials

For Fall or Spring Planting

Varieties marked * are especially suitable for Rock Gardens
T for tall-growing; M for medium-growing; D for dwarf-growing

Super-Quality Hedging

EXTRA HEAVY PLANTS

For Fall or Spring Planting

Be sure to specify size on order blank

All sizes refer to height above roots

(Any quantity of Hedging may be sold at the 100 rate)

	Hundred
Barberry Thunbergii, Two Year Seedlings	
9 to 12 in.	\$ 9.50
12 to 15 in.	13.50
Barberry Thunbergii, Four Year Large Transplants	
For Immediate Effect.	
12 to 18 in.	24.00
18 to 24 in.	38.50
2 to 3 ft.	62.00
No hedge is more beautiful and at the same time gives more protection than Barberry Thunbergii. Best of all it is perfectly hardy. It is practically impossible to kill it. 4 year transplants provides immediate effect.	
Eternal Flame, New Red Leaf Barberry	
12 to 15 in.	55.00
Privet, Amoor River (Very Hardy)	
Grows and thrives in any climate. Foliage remains green most all winter.	
12 to 18 in.	17.50
18 to 24 in.	25.00
2 to 3 ft.	30.00
Privet, California	
Grows and thrives in climates down to 12° below zero.	
6 to 12 in.	6.90
12 to 18 in.	9.90
18 to 24 in.	12.90
2 to 3 ft.	16.50
Privet, Ibota, 12 to 18 in.	21.00

Shade Tree Seedlings

FOR SPRING PLANTING ONLY

(Cannot be Shipped in the Fall)

For reforestation, fence posts, tall hedges, wind breaks and screen planting.

	Hundred
Catalpa Speciosa, 18 to 24 in.	\$ 9.00
Chinese Elm, 2 to 3 ft.	12.00
Lombardy Poplar, 2 to 3 ft.	30.00
Locust, black 18 to 24 in.	9.90
Locust, Honey, 18 to 24 in.	9.90
Locust, yellow, 18 to 24 in.	9.90
Russian Mulberry, 2 to 3 ft.	9.90

Flowering Hedges

For Fall or Spring Planting

COLORFUL—BEAUTIFUL

(Any quantity over 10 may be sold at hundred rate.)

	Hundred
Althea, white, pink, purple, red, blue, 2 to 3 ft.	\$65.00
Spirea, Van Houtte, 12 to 18 in.	21.00

Flowering Shrubs

For Fall or Spring Planting

HARDY, TWO YEAR FIELD GROWN, READY-TO-BLOOM

All our flowering shrubs have bloomed at the nursery farm the season before marketing

- VD means Very Dwarf, 2-3 ft. at maturity.
 D means Dwarf, 3-4 ft. at maturity.
 MD means Medium Dwarf, 4-5 ft. at maturity.
 M means Medium, 5-6 ft. at maturity.
 MT means Medium Tall, 6-7 ft. at maturity.
 T means Tall, 8-10 ft. at maturity.
 VT means Very Tall, over 12 ft. at maturity.

Varieties marked * are especially suited for Rock Gardens

Sizes given below are the height of shrubs above the roots when shipped

	Each	Three for
Althea, (Rose of Sharon), double blue, 2 to 3 ft., T..\$.95	\$2.70
Althea, (Rose of Sharon), double white, 2 to 3 ft., T	.95	2.70
Althea, (Rose of Sharon), double pink, 2 to 3 ft., T.	.95	2.70
Althea, (Rose of Sharon), double purple, 2 to 3 ft., T	.95	2.70
Althea, (Rose of Sharon), double red, 2 to 3 ft., T..	.95	2.70
Althea Tree, 3 to 4 ft., pink, red, purple, white, T...	1.35	3.90
The Altheas are especially desirable as they furnish a profusion of bloom late in the season when other blossoms are scarce. They will bloom freely even in very dry weather, yield readily to any kind of training and are admirable for hedges, screens or individual planting.		
Almond, double pink or white, 2 to 3 ft., MD	1.45	4.15
Unlike ordinary kinds which are "budded" on Peach Seedlings, our Flowering Almonds are "budded" on hardy, vigorous PLUM SEEDLINGS. This insures "long life", plus the vigor necessary to produce an abundance of beautiful bloom.		
Barberry, Thunbergii, 2 to 3 ft., D.....	.75	2.15
Barberry, Thunbergii, 18 to 24 in., D55	1.55
Barberry, Red Leaf, Eternal Flame, 15 to 18 in., D..	.80	2.25
Barberry, Red Leaf, Eternal Flame, 18 to 24 in., D..	.95	2.70
Beauty Bush, pink, 18 to 24 in., M.....	1.65	4.70
Blue Leaf Honeysuckle, shell-pink, Blue-Green Leaves, 2 to 3 ft., T	1.95	5.60
Burning Bush, (Square Branches), 18 to 24 in. MT..	2.45	6.80
Butterfly Bush, Pink Charming, lavender-pink, MT.	.95	2.70
Butterfly Bush, violet blue, MT75	2.15
Butterfly Bush, Ile de France, royal violet, MT.....	.85	2.45
Calycanthus, (Carolina Allspice or Sweet Scented Shrub) chocolate brown blossoms, 2 to 3 ft., MD..	1.25	3.65
Coralberry, (Indian Currant), pink, 2 to 3 ft., D....	.85	2.45
Cornus Siberica Alba, (Red Twig Dogwood), 2 to 3 ft. MT95	2.70
Cornus Elegantissima, or variegated, green and white leaves, 2 to 3 ft., M	1.45	4.15
Cornus Sanguinea, (Red Osier Dogwood), white flower, 2 to 3 ft., T95	2.70
Cornus Paniculata, (Gray Dogwood), white flower, 2 to 3 ft., VT95	2.70
Crab, Flowering, (See page 18)		
Cranberry Bush, (Viburnum Opulus), white, 2-3 ft., T	1.65	4.70
Daphne, Somerset, sweet-scented, blush pink (nearly Evergreen foliage) 18 to 24 in.	3.00	8.45
*Deutzia Gracilis, slender, white, 12 to 18 in., VD....	.95	2.70
Deutzia Lemoine, white, 18 to 24 in., D	1.25	3.65

WE OFFER ONLY WELL BRANCHED,
HEAVY ROOTED, LANDSCAPE SIZE

Flowering Shrubs

(Shrubs Continued)

	Three Each for	
Deutzia Pride of Rochester, white, 2 to 3 ft., T.....	\$.95	\$2.70
The best of the taller Deutzias. A general favorite and its popularity is well deserved.		
Dogwood, (Cornus Paniculata), gray, 2-3 ft. VT....	.95	2.70
Elder Golden, white flowers, 2 to 3 ft., T.....	.95	2.70
Eternal Flame, Red Leaf Barberry, 15 to 18 in., D..	.80	2.25
Eternal Flame, Red Leaf Barberry, 18 to 24 in., D..	.95	2.70
Flowering Quince, scarlet, 2 to 3 ft., MD	1.45	4.15
No shrub planting is complete without this beautiful double flowering Quince. Its gorgeous display of dazzling scarlet flowers in May cover the branches before the foliage appears.		
Forsythia Fortunei, Golden Bell, yellow, 2 to 3 ft. MT	1.15	3.25
Blossoms in the spring before the leaves appear. Very desirable and popular.		
Forsythia Viridissima, (Upright Golden Bell), yellow, 2 to 3 ft. MT	1.15	3.25
Forsythia Intermedia, yellow, 2 to 3 ft. MT.....	1.15	3.25
*Forsythia Spectabilis, golden 2 to 3 ft. T.....	1.15	3.25
Fringe, purple, 2 to 3 ft. VT.....	2.15	6.15
Golden Bell, (Forsythia Fortunei), 2 to 3 ft. MT....	1.15	3.25
Golden Elder, (Golden Leaves), 2 to 3 ft. T.....	.95	2.70
Golden Nine Bark, yellow leaves, white flowers, 2 to 3 ft. T	1.25	3.65
Golden Rose of China, (Hugonis), yellow, 18 to 24 in. MD	1.45	4.15
Golden Vicary, Golden yellow foliage, 18 to 24 in., M	1.65	4.70
Honeysuckle Blue Leaf, shell-pink, Blue-Green Leaves; 2 to 3 ft., T.....	1.95	5.60
Honeysuckle Fragrant, bush, creamy white, 2-3 ft. M	.95	2.70
Honeysuckle Morrow's, white, 2 to 3 ft. MT.....	.95	2.70
Honeysuckle Tartarian, white, pink or red, 2 to 3 ft. T	.95	2.70
Hugonis, (Golden Rose of China), yellow, 18-24 in. MD	1.45	4.15
Hydrangea Arborescens, (Hills of Snow), white, 2 to 3 ft. D	1.45	4.15
Hydrangea, P. G. Bush, pink, 2 to 3 ft., MT	1.45	4.15
Hydrangea Tree, mammoth pink, 3 to 4 ft., T.....	2.65	7.45
Hydrangea Hortensis, French, blue, 5 to 6 branches D (needs winter protection in below zero temperatures.)	1.95	5.60
Ile de France, (Butterfly Bush), deep violet, MD...	.85	2.45
A gorgeous flowering shrub recently originated in France. Long, arched, lilac-like, violet-purple clusters bloom in great abundance in mid-summer at a time when scarcely anything is in bloom. The thickly flowered spikes are very showy in the garden and make delightful bouquets. Very fragrant. Vigorous, hardy grower.		
Indian Currant, (Coralberry), 2 to 3 ft. D85	2.45
Kerria Japonica (Globe Flower), yellow, 18 to 24 in. MD	2.65 1.95	7.45 5.60
Kerria White (Jet Bead), black berries, 18 to 24 in. MD	1.45	4.15
Lilac, Adelaide Dunbar, very double red mauve, MT	2.15	6.15
Lilac, Chas. Joly, double purplish red, MT	2.15	6.15
Lilac, Chas. Tenth, deep red, 2 to 3 ft. MT	2.15	6.15
Lilac, Edith Cavell, double pure white, MT	2.15	6.15
Lilac, Madame Lemoine, white, double, 2 to 3 ft. MT	2.15	6.15
Lilac, Ludwig Spaeth, dark purple, 2 to 3 ft., MT...	2.15	6.15
Lilac, Marie Legraye, white, 2 to 3 ft., MT.....	2.15	6.15
Lilac, Michael Buchner, deep lilac, dbl, 2 to 3 ft. MT	2.15	6.15

There is a Shrub Bargain Group to meet your needs. See page 30.

Flowering Shrubs

(Shrubs Continued)

	Each	Three for
Lilac, Pres. Grevy, blue, double, 2 to 3 ft., MT.....	\$2.15	\$6.15
Lilac, Persian, 2 to 3 ft., T.....	1.25	3.65
Lilac, pink or white, 2 to 3 ft., VT.....	1.25	3.65
Lilac, red, 2 to 3 ft., VT.....	1.45	4.15
Lilac, purple, 2 to 3 ft., VT.....	.95	2.70
Lilac, Villosa, pink-lilac, narrow panicles, 2 to 3 ft. MT	1.25	3.65
Pepper Bush, white, 2 to 3 ft., MD	1.65	4.70
Philadelphus Aurea, (Golden Syringa), 15 to 18 in., MD	1.65	4.70
*Privet, Regal, blue berries, 2 to 3 ft., M.....	1.65	4.70
Purple Fringe, 2 to 3 ft. VT.....	2.15	6.15
Pussy Willow, French, 2 to 3 ft., VT.....	.95	2.70
Rose Acacia, pink, 2 to 3 ft., M	1.45	4.15
Rose of Sharon (See Althea), 2 to 3 ft., T.....	.95	2.70
Snowball, Common, white, 2 to 3 ft., T.....	1.45	4.15
Snowball, Dentatum, (Arrowwood), 2 to 3 ft., VT...	1.25	3.65
Snowball, Japan, white, 2 to 3 ft., MT.....	1.65	4.70
Snowberry, white berries, 2 to 3 ft., MD.....	.85	2.45

The Snowberry is a shrub of great value—for its fine foliage—slender gracefully bending branches—dainty pink blossoms in June and July. It will thrive in dry barren soil—it will grow in shade so dense that almost nothing else will grow. Large white berries in Fall are very decorative.

Spirea, Anthony Waterer, crimson, 12 to 18 in., VD	.95	2.70
Spirea, Aurea, (Golden), 2 to 3 ft., T.....	1.25	3.65
Spirea, Astilbe, (A Perennial), VD95	2.70
Spirea, Billardi, pink, 2 to 3 ft., M.....	.95	2.70
Spirea, Bumalda, light pink, 18 to 24 in., VD.....	1.15	3.25
*Spirea, Callosa Alba, white, 12 to 18 in., VD.....	1.25	3.65
Spirea, Douglasi, pink, 2 to 3 ft., MT.....	1.15	3.25
*Spirea, Froebelia, pink, 12 to 18 in., D.....	1.15	3.25
Spirea, Golden, (Aurea), 2 to 3 ft., T.....	1.25	3.65
Spirea, Prunifolia, (Bridal Wreath) white, 2 to 3 ft., MT	1.45	4.15
*Spirea, Thunbergii, white, 18 to 24 in., MD.....	1.15	3.25
Spirea, Van Houtte, white, 2 to 3 ft. MT.....	.55	1.55
Spirea, Van Houtte, white, 3 to 4 ft. MT.....	.65	1.85

The most popular of all the Spireas, especially valued because of its hardiness and the rapidity of its growth. Produces white flowers in clusters during May and June. Foliage dense deep green.

Syringa, Coronarius (Mock Orange), white, 2 to 3 ft. T95	2.70
Syringa, Golden (Philadelphus Aurea), 15 to 18 in., MD	1.65	4.70
Syringa, Lemoine, very sweet scented, white, 2 to 3 ft., MT95	2.70
Syringa, Virginalis, white, 2 to 3 ft., MT.....	1.65	4.70

Because of its rare beauty, its unusually long blooming period beginning in May, its large white individual flowers, which measure two inches or more in diameter, Syringa Virginalis should be in every planting.

*Tamarix, (Tamarisk), pink, 2 to 3 ft., VT.....	1.25	3.65
*Viburnum, (Snowball), white, 2 to 3 ft., T.....	1.45	4.15
Vitex Macrophylla, sky-blue, 18 to 24 in., M.....	1.50	4.25
Weigela, Amabilis, pink, 2 to 3 ft., MT.....	.95	2.70
Weigela, Candida, white, 2 to 3 ft., MT.....	.95	2.70
*Weigela, Eva Rathke, crimson, 18 to 24 in., MD....	1.35	3.90
Weigela, Floribunda, dark red, 18 to 24 in., MT....	1.35	3.90
Weigela, Rosea, bright rose, 2 to 3 ft., MT.....	1.25	3.65
Weigela, Variegated, rose pink, 18 to 24 in., MT	1.95	1.45 4.15 5.40
*Witch Hazel, yellow, 2 to 3 ft., T.....	1.25	3.65
Winged Burning Bush, square branches, 18 to 24 in., MT	2.45	6.80

Vines

Wilhelm Kordes, golden, copper and red tints.....	1.25

ALWAYS PLANT THOROBRED ROSES

Superior quality Roses are all strong, vigorous, field-grown bushes. Not spindly, green-house or southern-grown weaklings.

Here's the reason—for propagating Pedigreed Roses, the type of root stock selected is particularly selected for the variety to be grown.

Only certain types of strong growing, disease resisting, hardy root stocks are used. Some of these root stocks are imported from Holland and France. Others are grown in certain sections of the United States.

After the hardy root stock has grown for one year or more, the desired variety is then budded, by the Shield Type Protection Budding Process.

The budded stock is then allowed to grow for two years, into a strong, vigorous bush, full of vitality and ready-to-bloom in your garden.

The "best" Roses are produced from Pedigreed Parents and budded on hardy, strong growing root stock. Therefore, you can readily see why only the "best" quality roses should be planted on your home grounds. Don't be fooled, by cheap inferior rose bushes—plant our ROSES and enjoy magnificent, lovely, fragrant Roses in your garden.

Hardy Climbing and Rambler Roses

FOR TRELLIS, PORCH AND ARBOR

For Fall or Spring Planting

SECTION "A"

	Each	Two for

Tree Roses

for Spring Planting Only

(Do not take orders for Tree Roses for Fall Planting)

	Each	Two for
Extra Large Selected Trees, 3½ ft. tall	6.95 5.45	10.50 13.30
Following named varieties:—		
Catalonia, orange-vermillion		
J. Otto Thielow, rose-pink		
Mrs. Pierre S. Du Pont, creamy-yellow		
Mme. Jules Bouche, white, rose center		
Robin Hood, rich red		

HOW TO GROW TREE ROSES SUCCESSFULLY

Plant in SPRING ONLY. Tie the stem securely to a stake with strips of cloth. Prune back the flowering branches each season to 3 or 4 eyes.

WINTER PROTECTION in Cold Climate: Before freezing weather starts bend the stem over slowly until the head rests on the ground, loosening the roots with a fork on the side opposite from the side the stem is being bent. Drive a stake next to the crown and tie securely. Then cover entire head with soil. Stem can be protected with burlap or paper.

Ornamental Trees

FOR SHADE AND BEAUTY

For Fall or Spring Planting

Our experience of many years has shown us that the size appearing after each variety transplants to the best advantage.

"S" means suitable for street planting. "L" suitable for lawn planting.

All sizes refer to height above roots

Be sure to give size

	Each	Two for
Althea Tree, 3 to 4 ft., pink, red, purple, white, L. . .	\$1.35	\$2.55
Ash, American, 8 to 10 ft., S.	2.65	5.00
Basswood, (See Linden)

A Common Sense Talk On Quality

(Continued From Page 3)

NU-WAY SPACING

Have you ever noticed when driving past a piece of woods, what appeared to be a nice, shapely Evergreen or Shade Tree?

It takes your eye. You get out, walk back in the woods to examine it, but to your disappointment, find it's a fine shapely tree on one side only—and on the other side, ill-shaped, unbranched and unsightly.

What's the cause?

The shapely side enjoyed plenty of room to develop. It received its share of sunlight. The other side was crowded in a density of other growth. Crowding and lack of sunlight are sure to result in unsightly, ill-shaped trees and plants.

With NU-WAY SPACING, trees and plants have plenty of room for cross cultivation, both in the rows and between the rows. They enjoy plenty of sunlight. There is sufficient space for perfect development.

This Nu-Way Spacing method of propagation requires nearly double the acreage to grow the same quantity as compared with the Crowding plan used for growing "cheap stock."

Nu-Way Spacing produces round, bushy, shapely trees and plants—trees and plants that fulfill every expectation of our customers.

All sizes of Fruit Trees refer to height above roots.

Peach Trees

**PEACH TREES WILL LIVE AND GROW BETTER IF
PLANTED IN THE SPRING. FALL PLANTING
IS NOT RECOMMENDED**

Peach trees, unlike other Fruit Trees, do not become dormant early in the Fall, that is, the sap does not return to the roots as early as with other types of Fruit Trees.

As a result of this condition, should the Winter be severe the losses on Fall Planted Peach Trees is apt to be heavy. To eliminate this possibility we recommend that Peach Trees be planted in the SPRING. All other Fruit Trees can be planted either in the Fall or Spring.

Extra Early Varieties: Bellmar, Blakemore, Beaver, Premier, (Howard No. 17), Parson's Beauty, Senator Dunlap, (Dr. Burrill).

Medium Early: Bouquet, Big Joe, Marshall, Catskill, Dorset, Fairfax, Jumbo, Starbright.

Late Varieties: Aroma, Gandy, William Belt, Chesapeake, Brandywine.

The original plant that produces these new plants we sell is not allowed to produce fruit. Thus, the surplus growing strength and vigor that would ordinarily be consumed in producing strawberries is transmitted by nature from the Mother plant to her offspring, resulting in producing vigorous, heavy-rooted, top quality plants, capable of bearing profitable crops of First Quality Berries for our customer. Only the plants that develop close to the Mother plant are used. Weak, inferior quality plants that grow at the end of the runners are not used in filling our orders.

Compare these rigid methods with what could be used if our aim or motto was, "Not how good, but, how cheap."

Suppose the mother plant was allowed to produce fruit—Sold the fruit for profit, then later sold the plants to the unsuspecting public. Naturally, we could sell such plants at low price and still be ahead.

We will not sell a customer a plant or tree of any kind that we would not plant ourselves. (See Inside Back Cover for shipping information.)

RECOMMENDED DISTANCE FOR PLANTING AND NUMBER OF TREES AND PLANTS PER ACRE

Apples:

36 x 36 ft.— 33 Trees
40 x 40 ft.— 27 Trees

Apricots:

18 x 18 ft.— 134 Trees
20 x 20 ft.— 108 Trees
24 x 24 ft.— 75 Trees

Blackberries:

3 x 7 ft.—2074 Bushes

Cherries—Sour:

18 x 18 ft.— 134 Trees
20 x 20 ft.— 108 Trees

Cherries—Sweet:

24 x 24 ft.— 75 Trees
30 x 30 ft.— 48 Trees
36 x 36 ft.— 33 Trees

Currants:

4 x 6 ft.—1815 Bushes
5 x 5 ft.—1742 Bushes
4 x 7 ft.—1556 Bushes
4 x 8 ft.—1361 Bushes

Gooseberries:

4 x 6 ft.—1815 Bushes
5 x 5 ft.—1742 Bushes

Grapes (on trellis):

8 x 8 ft.— 680 Vines

Grapes (arbor):

6 x 6 ft.—1210 Vines

Peaches:

18 x 18 ft.— 134 Trees
20 x 20 ft.— 108 Trees

Pears (standard):

18 x 18 ft.— 134 Trees
20 x 20 ft.— 108 Trees
24 x 24 ft.— 75 Trees

Pears (dwarf):

10 x 10 ft.— 435 Trees
12 x 12 ft.— 302 Trees
15 x 15 ft.— 193 Trees

Plums:

18 x 18 ft.— 134 Trees
20 x 20 ft.— 108 Trees
24 x 24 ft.— 75 Trees

Quinces:

10 x 10 ft.— 435 Trees
12 x 12 ft.— 302 Trees
15 x 15 ft.— 193 Trees

Raspberries (red):

2 x 7 ft.—3111 Bushes
3 x 7 ft.—2074 Bushes

Raspberries (black):

3 x 7 ft.—2074 Bushes

Strawberries:

1 x 4 ft.—10,890 Plants

To estimate the number of plants required for an acre at any given distance, multiply the distance between the rows by the distance between the plants, which will give the number of square feet allotted to each plant, and divide the number of square feet in an acre (43,560) by this number. The quotient will be the number of plants required.

AGE AT WHICH DIFFERENT TREES USUALLY FRUIT

XXX Size Only

This varies greatly with different varieties. Such apples as "Yellow Transparent" and "Duchess of Oldenburg" often fruit the second year, while "Northern Spy" seldom fruit in less than ten years after transplanting, though it is one of the best apples and a prolific yielder when of bearing age. The average time after planting is, for

Apples	2 to 6 yrs.	Grapes	2 yrs.
Blackberries	1 to 2 "	Plums	2 to 4 "
Cherries	3 to 4 "	Peaches	2 to 3 "
Crab Apples	2 to 6 "	Quinces	3 to 4 "
Currants	1 to 2 "	Raspberries	1 to 2 "
Dwarf Pears	2 "	Std. Pears	3 to 4 "
Gooseberries	1 to 2 "		

Good Trees Are Great Money Makers

By SAMUEL FRAZER

(From The American Agriculturist)

Think of the time and energy which the planter and his children will waste growing a scrub tree when they might be reaping dollars by caring for a good one! We never get something for nothing. It costs more to grow a tree right than to grow a scrub.

The public can get what it pays for and no more. The fruit grower who wants a tree well-grown on first-class roots, propagated with care will have to pay enough to reimburse for the additional expense in propagating.

GETTING YOUR MONEY'S WORTH

The possibility of the tree repaying the expenditure depends to an enormous extent upon the judgment used in the first purchase. If a cheap, poorly grown tree is planted, one may never get the reward.

It is interesting to note that the yield of the bearing trees of the United States is frequently one-tenth of a barrel per tree; in other words, there are a lot of drones in the orchards. For the live producers the important question is: Am I going to plant a drone tree or a producer?

PEDIGREED TREES PAY BIG

There are apple orchards which are averaging 10 barrels a tree. These orchards for a term of years will run in a gross revenue from \$20.00, to as high as \$40.00 a tree; in other words, one single apple tree will turn in as much money as an acre of beans or wheat or as much revenue as the average cow and have to feed her three times a day and milk her twice.

The same farmer who is going to buy an apple tree, when he contemplates purchasing a horse will always prefer and pay more for a well-bred, well put up, close-coupled work horse, because he can do more work. If he is well-bred he is worth more than a scrub.

He will pay more for a cow capable of producing 10,000 pounds of milk than for one whose maximum is 4,000. Why not use the same judgment in buying trees?

SHIPPING INFORMATION COVERING STRAWBERRY PLANTS

Many people have the mistaken idea that August is the best time to plant Strawberry Plants. The fact is, the only plants which could possibly be planted in August are either Old Plants which have borne one or more crops of Fruit, or Pot Plants. The first are not satisfactory and the second are impractical.

The plants we sell are field grown New Plants, have never borne fruit and under normal growing conditions it is impossible to develop a rugged, heavy, fibrous-rooted new plant for August shipment. They are not fully developed until late September, but because of their vitality and ruggedness will become established in their new home before Winter sets in.
